

RAW FILE PROCESSING

Once upon a time getting back a perfect set of prints involved nothing more than a five minute drop off at the lab and an additional five minute collection at the end of the week. WOW ! hasn't digital helped us all..Sure you have more control over your images by shooting digitally but you probably have a better sexual relationship with your mouse or waicom, than you partner.

Finally there is a solution.

We have developed an efficient production workflow for every wedding studio

WEDDING PACKAGE

- *Processing all **RAW** files
- *Colour & density correction
- *Proof prints including front numbering and studio logo
or
*print runs up to 5x7"
or
* 12"x14" contact sheets

INFO

With the input and ideas of some of our loyal customers this system has been tried and tested over many weddings to ensure smooth workflow. Our customers have discovered the easiest way to produce quality digital files is to get us to do them. If your studio could benefit from such a great system, please email us for information pack and prices and enjoy the digital age.
